Summary

- Professional **java** software developer with over 12 years of work experience, worked majorly in **Java product development , product maintenance and support** for programs in **Banking and Financial Services** and involved in **Java/J2EE technologies**.
 - Java/J2EE experience in **design, development, testing and implementation** of **Java** and **J2EE** based applications with proficiency in **Object - Oriented Analysis and Design** .
 - Good experience in all the **core java** concepts including Multithreading, Servlets, Collections, Exception Handling etc.
 - Experience in all the phases of Software Development Life Cycle.
 - Knowledge in major J2EE Technologies including Spring, Spring Boot, Web Services, Servlets, JSP, JDBC, HTML .
 - Proficient experience in using the databases such as Oracle 9i/10g/11g.
 - Expertise in configuring, using and administrating version control systems like CVS.
 - Extensive experience in XML related technologies
 - Hands-on experience in using the Integrated Development Environments such as Eclipse, Net Beans
 - Working experience with web/application servers like Tomcat, Web Logic, Web Sphere.
-

Technical Skills

Java Skills : CORE Java , J2EE, JDK 1/5/1.6/1.7/1.8, EJB , HTTP, JNDI , Servlets, JDBC, JSP, Webservices, Spring, Spring Boot REST APIs

Web Technologies: HTML, Javascript

Databases: SQL,PL/SQL(Oracle)

Application/Web Servers : IBM-WAS , Oracle-Weblogic, Jboss ,Apache Tomcat

Tools: Eclipse, Postman, SOAP UI, SQL developer

Experience

Edgeverve (Infosys), Product Technical Lead (2010-present)

- Worked as part of **Product Architecture** team in **Finacle Integration layer** for **Finacle(Leading Banking Solution)** .
- Majorly into **product development ,maintenance and support , Product Management and People Management**.
- Expert in **Finacle Interfaces**.
- Played key role in banks digital transformation by developing **Finacle API's for Finacle-Core, CRM, SVS and SSO modules**.
- **Developing new enhancements and maintenance of existing product functionalities** as per banks expectation across **Finacle 10.x versions**.
- Automating the **API service layer** in order to make application more flexible.
- In-depth knowledge of various tools such as:- **SOAP UI, Postman, SQL developer , Eclipse**.
- Good Knowledge on different messages,Implementation of channel interfaces(**E-Banking, Mbanking,ATM, POS, and etc**) for banks.
- Participated in **performance tuning activities**.
- Provides key support to **Banks Interfaces teams**.
- Experienced in inbound/Outbound customization for **FI-CORE and FI-CRM APIs**.
- Currently working on **Finacle frameworks, HTTP framework, Asynch framework, API framework**.
- **Top performing team player & quick learner** with strong adaptability to manage high team performance through mentoring & problem-solving.

Key Projects Accomplished:

• FI product maintenance and support(All 10.x versions):

Period: September 2015 - Current

Technologies:Java ,J2EE,EJB,HTTP, Webservices

- Involved in **new API enhancements**.
- Providing clarifications required by implementation teams on **API functionality**.
- Resolving setup issues faced by banks/implementation teams for **WAS/JBOSS/WL** installations.
- Involved in **migration issues,log4j and DOCKER deployments**.
- Handling team supporting **FI for 25+ banks**.
- Quick resolution of **production/implementation issues** within SLA.
- Participated in **Code reviews,contributed to knowledge documents**.
- **Mentoring** new joinees and training freshers.

• SWIFT 2020/2021 changes in FI:

Period: August 2022 - August 2021 **Technologies:** Java ,J2EE,EJB,HTTP, Webservices

- Understanding the **requirements from CORE**, identifying changes in **FI APIs for TFIN module(Trade Finance)** for SWIFT message generation ,development and ensured proper deliverables are delivered to all the impacted versions from FI in patch mode well ahead of time with utmost quality.

• ESCROW Activity:

Period: September 2020 - Current **Role:** SPOC

- SPOC from FI for **ESCROW Activity 2020/2021**.
- As part of presentation, sharing the latest source code to Consultants, explain the contents of source code, clarify queries from FI.

• Porting activities:

Period: September 2012 - Current **Technologies:** Java ,J2EE,EJB,HTTP, Webservices

- Anchoring and leading the changes related to **porting activities from FI for several banks**.
- Rebuilding the FI code with the new stack -**Change in JDK**.

Awards

GEM Award - For excelling in technical skills , support on critical issues and solving complex issues raised by 10.2.25 banks.

Zenith Award - For implementing SWIFT 2021 changes in patch mode to 100+ banks for TFIN module in different architecture across versions well ahead of time and early delivery.

Best Customer Experience Award - Testing FI tools by enabling IE over Edge when MS ended support of Internet Explorer.

Eductation(2003-2006)

MCA from Badruka college of IT , Hyderabad.
