PROJECTS

Title: MyConcerto – Sales Advisor

Technology used: HTML, SCSS, Java Script, React JS, API implementation

Abstract: This job is intended for people creating and maintaining commercially available software products owned by Accenture, or owned by a client. In this project I have worked on designing as per figma as well as worked in the CRUD module for every feature. I have done the R&D of microsite implementation on the same site.

Title: MyConcerto – Studio

Technology used: HTML, CSS, Java Script, JQuery, API implementation

Abstract: This job is intended for people creating and maintaining commercially available software products owned by Accenture, or owned by a client. In this, I have converted static templates as editable and reusable templates. I have worked on many features like proposals, credentials, template conversion, etc., I have done the R&D of the PPT upload/download implementation on the same site.

Title: KSC CBSE Website

Technology used: HTML, CSS, Java Script, JQuery, Core PHP.

Abstract: KSC CBSE school website is a school billing and maintenance software. This software has several modules. There are admission registration, van no allocation, school and van fees collection, student progress report and TC generation, Entry Modules like Student Standard, section, subject, exam name, etc., I also did the print and excel option to download a particular and entire set of data.

Title: SKM Chikitchaalaya

Technology used: HTML, CSS, Java Script, JQuery, PHP and Yii framework. Abstract: SKM Chikitchaalaya website is a medication billing software. This software has several modules. There are patient registration, medicine in and out stock, billing, doctor prescription summary and medicine history entry forms, Stock transfer, Bill return etc., I also did print and excel option to download a particular and entire set of data.

Title: EasyGoSafari, Adotrip

Technology used: HTML, CSS, Java Script, JQuery, PHP and codeigniter framework

Abstract: This project is mainly used for travel based booking systems. In this project I have worked holiday, car and transfer search. I have worked in supervision, supplier, user-end. I have worked error handling and bug fixing in this project. My part of code is creating the entry modules in supervision and supplier modules and changing the entire logic and functionalities based on user requirements.
