Participated in architecture, design and implementation of back-end features using Tulip
- Writing stored procedures, Queries and creating tables in MSSQL Server.
- Validating logs after application deployment.

Name: Sunstar India pvt ltd (Inventory Management System)

Client: Sunstar India pvt ltd

Role: Software Engineer

Team Size: 9

Technologies: C#, MSSQL Server, JQuery, ASP.Net Core, Web API

Description: Sunstar India pvt ltd (Inventory Management System) is an application that is subjected to replace the existing manual process and to users to get an access with system which is designed to manage and organize paper documents using software and computerized system.

Responsibilities:

- Involving in Client meetings for requirement gathering.
- Developed with the Well standards of Dot net technologies
- Involving Code Deployment in Different servers like (Dev, Quality, Production)
- Generating scripts in different environments.
- Providing support to the client For the Sunstar India pvt ltd project.

Name: HospitalManagement System(krishna hospital, karad)

Client: krishna charitable trust

Role: Software Engineer

Team size:4

Technology: C#, ASP.Net ,MSSQL Server, JQuery, CSS,Bootstrapping,HTML

Description: The purpose of this project is to computerize all details regarding patient details and hospital detail.

Responsibilities:

- Created procedures for system monitoring, recovery, backup and optimization.
- Gathered and defined customer requirements to develop clear specifications for project plans.
- Revised, modularized and updated old code bases to modern development standards, reducing operating costs and improving functionality

Name: H5(Office Staff Management System)

Client: Voith HR

Role: Software Engineer

Team size:12

Technology: C#, ASP.Net ,MSSQL Server, JQuery, CSS,Bootstrapping,HTML

Description: Project is related to Commerce application related to computerize all details regarding staff details and management details. The existing application is built. The present application has many services.

Responsibilities:

- Gathered and defined customer requirements to develop clear specifications for project plans.
- Worked with software development and testing team members to design and develop robust solutions to meet client requirements for functionality, scalability and performance.
- Following the branching strategy like merging and others.
- Validating logs after application deployment

Name: Voith HR(Employee Management System)

Client: Voith HR

Role: Software Engineer

Team Size: 16

Technologies: ASP.NET, C#, JavaScript, HTML, CSS, Visual Studio 2013.

Description: Voith HR(Employee Management System) Project is related to Commerce application related to computerize all details regarding Candidate details and management details. The existing application is built. The present application has many services.

Responsibilities:

- Revised, modularized and updated old code bases to modern development standards, reducing operating costs and improving functionality.
- Validate the employee data to display user friendly message.
- Worked with software development and testing team members to design and develop robust solutions to meet client requirements for functionality, scalability and performance.
- Writing stored procedures, Queries and creating tables in MSSQL Server.

CERTIFICATE

- Seed InfoTech, pune
Certificate in Asp.net Programming (2017-18)
Certificate in Angular (2017-18)

EDUCATION

Degree Name :	Master of Computer Applications University	Post-Graduated, April 2015
