WORK EXPERIENCE

Software Developer - Atyeti Inc.

[July 2021 - Current]

- Proficient in Technical Stack: Spring Boot, Java, Java 8, Angular, MySQL, Oracle.
- Expertise in all phases of Software Development Life Cycle (SDLC) process.

PROJECTS

1. LRM (Liquidity Risk Metrics)

Client: Credit Suisse; Duration: 1 Year

- Led the design of the underlying architecture and prepared the base code for the application.
- Developed and maintained high-quality, efficient, and reliable Java code, following coding standards and best practices.
- Collaborated with cross-functional teams to gather requirements, define project scope, and deliver software solutions on time.
- Created and maintained RESTful APIs using Spring Framework for seamless integration.
- Utilized Git for version control and effective collaboration.
- Investigated and resolved bugs, ensuring timely fixes and updates.
- Contributed to code reviews and migration of legacy systems to newer technologies.
- Actively participated in agile development processes, enhancing team productivity.
- Created technical documentation and user guides for knowledge transfer.

2. Workforce Management

Client: Internal; Duration: 6 Months

- Served as Project Lead, responsible for sprint planning and managing JIRA board.
- Worked as a full-stack developer, developing screens from front-end (Angular, HTML, CSS) to back-end (Java, Spring Boot, Hibernate, MySQL).
- Collaborated with DevOps to maintain the code base and ensure successful builds.
- Developed organization charts using Angular and ChartJS.
- Created technical documentation and user guides for knowledge transfer.

3. Tradebull

Client: Internal; Duration: 6 Months

- Enhanced and developed multiple screens for a trading application.
- Worked on front-end (Angular, HTML, CSS) and back-end (Java, Spring Boot, Hibernate, MySQL).

- Optimized website performance and responsiveness using Angular.
- Demonstrated the web application to stakeholders.
- Successfully deployed and managed the application on Microsoft Azure.

TECHNICAL SKILLS

- Backend Technologies & Frameworks: Java, J2EE, Hibernate, Spring Boot
- Frontend Technologies & Frameworks: HTML, CSS, Angular
- Databases: MySQL, Oracle, Impala
- Tools: IntelliJ, Eclipse, Visual Studio Code
- Version Control: Git, Bitbucket

CERTIFICATIONS

- Java Training and Certification by Sai Infocorp Solution Pvt. Ltd., Nashik.
- Advanced Diploma in Java Technology from Profound Edutech, Pune

ACADEMICS

- Bachelor of Engineering (BE) in Computer Science, Pravara Rural Engineering College, Loni.
- Higher Secondary Certificate (HSC), R.B.N.B. College, Shrirampur.
