Summary:

- 2.5 Years of experience in IT and expertise in all aspects of Design and Development on Java, J2EE base system.
- Worked extensively on Java Platform and developing web and Enterprise applications Using Java/J2EE, JDBC, Servlets, JSP Spring and Hibernate.
- Good Implementation knowledge in J2EE Design Patterns like Factory, Singleton, DAO Design Patterns.
- Extensive knowledge of Core java concepts and its JSE API.
- Good Experience in using Web Sphere and Tomcat servers.
- Good Experience in using Oracle and DB2 databases.
- Good Experience in using Svn, Git, Maven, Eclipse and Jenkins Tools.
- Using Agile development methodology of Software development.
- Proven ability to quickly learn new technologies and apply them in business solutions
- Collaborates with team members, customers, development teams in order to produce high quality

Professional Experience:

JAVA DEVELOPER WITH TCS FROM OCT 2020 TO TILL DATE

Education :

Bachelore of technology : Electronics and Communication Engineering
University : Acharya Nagarjuna University
Collage : Chalapathi Institute Of Engineering And Technology
CGPA :7.8

Skills:

Programming Languages : Java
Frameworks : Spring Boot, Spring
Data JPA
Web Technologies : HTML5, CSS.

Web Servers : Apache Tomcat
IDE **H** : Eclipse, Spring
Tool
Databases : My SQL, Oracle
Tools : Eclipse, IntelliJ,
Postman, Jira

PROJECT:

Project Title : BNW (Brand New Workflow) – United States
Domain : Advertisements
Role : Java Developer
Technology : java 8, springboot, spring batch,
Database : Oracle 9i
IDE : Eclipse 3.x (Ganymede)
Repository : bitbucket,gitlab
Build Tools : MAVEN
Logging Tool : log4j

Description:

Brand New Workflow (BNW) is a distributed system which is developed to manage one or more Business Processes. One of the applications used in BNW is CSSI (Country Specific Service Implementation) and the main objective of this application is to provide the IT services which are needed to manage one or more human-centric business processes, including long-term storage of data. And the CSSI in turn uses BNW as a subsystem to manage the workflow aspects of those services.

Role: As a Team member

- Involved in Developing Enhancements features.
- Involved in Developing the Business logic by using springboot and Hibernate with Hibernate Template.
-
- Involved Writing in Unit-test cases.
- Writing Junit test cases using Mockito framework.
- Handling Exceptions by creating custom exception & global exception handler Classes.
- Resolve reported issues and reply to queries in a timely manner.
- Involving in code review process.
- Participate in Scrum meets daily to discuss various things about the project.
