 - Experienced in scenario identification based on requirements and adept at creating test cases using design techniques.
 - Good Knowledge in preparing Test Cases using Test Case Design Techniques.
 - Involved in Reviewing and Executing Test Cases.
 - Thorough knowledge on Testing Methodologies & Defect Life Cycle.
 - Competent in reviewing and executing test cases.
 - Well versed with Handling web Elements in Selenium WebDriver.
 - Proficient in defect tracking using tools like JIRA.
-

EDUCATIONAL QUALIFICATION

- B.E in Computer science and engineering from EWIT, Bangalore.
-

PROFESSIONAL EXPERIENCE

Subex

Aug 2021 - Present

Senior Software Engineer

Project: ROCPSRO

ROCPSRO is a software tool designed to settle the Partner calls and generate the bills. The System consumes the CDR generated from the partner, processes the files, extracts the call data, and calculates the rates according to the tariff prices and generates the bill. The system also sends the email of the bills generated. There are several other modules to reconcile bills generated, carrier invoice, auto Rate sheet imports etc.

Role: Manual/Automation tester

Designation: Senior Software Engineer

Line of Business: Telecom – Partner Billing

Tools: SQL developer, Jira, Selenium

Client: TGS, Vodafone-Idea, DTAC, Omantel, Lumen, Vodafone Ziggo, Telenor, Telstra, Lumen

Roles and Responsibilities:

- Part of requirement gathering calls with BA and other Stakeholders/Operations.
- Involved in effort estimation and confirming regression Testing scope by analyzing the modules getting impacted.
- Designing Test Scenarios after analyzing the Business Requirements document.
- Preparation and Execution of test cases.
- Maintaining the test results in Subex Quality Center.
- Attending Scrum calls, Back-log grooming calls, Sprint Review/Retrospective and Closing calls.
- Involved in Regression Testing using Java – Selenium.
- Preparation of weekly and monthly status reports.
- Preparation of Release documents and maintaining the release deliverables.
- Responsible for maintaining the Database and having refreshed with latest prod dumps provided every 6 months.
- Performing Installation activity for the new changes or defects in QA environments and proving support for the same in UAT and Pre-Prod environments.

PROFESSIONAL ACHIEVEMENTS AND CERTIFICATES:

- Project Management by Coursera issued Sep 2023
 - Python for Data Science by IBM issued Sep 2020
 - Google Cloud Infrastructure: Scaling and Automation by Coursera
Issued Apr 2020
 - C, C++, JAVA by NETCRAFTZ issued July 2018
-
