Skills

.NET Framework

ASP.NET

C#

SQL Server

PostgreSQL

Entity Framework

MVC

Object-Oriented Programming

Git, SVN

S3 Bucket

Results-driven .NET and SQL Developer with over 6+ years of experience in designing, developing, and maintaining efficient .NET applications, leveraging expertise in ASP.NET, C# and SQL Server. Proficient in identifying system requirements, addressing bottlenecks, and contributing to team meetings to troubleshoot and enhance software solutions. Dedicated and highly skilled Database Administrator with a strong background in configuring and maintaining database servers, ensuring robust security controls, and following best practices for Microsoft SQL Server. Seeking opportunities to apply in-depth knowledge and best practices to deliver high-quality software in a collaborative environment.

Experience

SYSTEMS ANALYST

RAMCO SYSTEMS / 06/2017 - 11/2021

Assist in production problem resolution as needed

Increased team productivity by training and providing guidance to new team member

Involved in the interaction with customer and internal teams to gather requirements for development purposes

Identifying area for modification in existing application and subsequently developing these modifications

Maintain the version control for every modification

Written clean, scalable code using .NET programming languages

Involved in reviewing the code and unit test results, sit results, running the sit and uat cycles end to end

Implemented unit tests to ensure code quality.

Monitored SQL Server maintenance tasks proactively, identifying and addressing issues promptly.

Senior Programmer

Ionixx Technologies Private Limited / 12/2021 - Present

Analyzed user requirements and collaborated with stakeholders to envision system features and functionality.

Designed, built, and maintained robust, reusable, and reliable .NET codebase, prioritizing features throughout the development lifecycle.

Identified bottlenecks and bugs, recommending optimal system solutions by evaluating custom development advantages and disadvantages.

Actively contributed to team meetings, resolving development and production issues across diverse environments and platforms.

Ensured effective design, development, validation, and support activities aligning with architectural requirements.

Communicated effectively with remote teams, fostering productive collaboration.

Configured and maintained database servers, ensuring optimal performance and reliability.

Implemented rigorous security controls and processes to safeguard sensitive data.

Provided recommendations for system architecture following Microsoft SQL Server best practices.

Participated in scheduled maintenance activities and supported release deployments.

Education

B.E (ECE)

RAMCO INSTITUTE OF TECHNOLOGY / 08/2013 - 05/2017
