PROJECTS

● Compfie Web Licence Application

Duration: 3 Month's

Technologies: MEAN Stack

- Developed a web application for license services to simplify the license application process.
- Non-registered users can raise queries for specific licenses, assigned to executive users by the admin.
- Registered users can request licenses, which the admin assigns to executive users based on location.
- Executive users verify requests and field executive users conduct on-site verification when required.
- Upon successful verification, the admin issues the specific license to the user. The project includes services like Shop Establishment License, Factory Registration License, etc.

● Ecommerce Shop

Duration: 3 Month's

Technologies: MEAN Stack

- The project involves the development of an Ecommerce Website, providing a platform for users to browse and purchase products.
- The admin holds the authority to create and update products, ensuring accurate specifications are listed for each item.
- User Interaction: Users have the privilege to add desired products to their shopping carts and proceed to place orders.
- The website is designed to offer a user-friendly interface, optimizing the shopping experience for customers.
- The system efficiently manages order processing, enabling the admin to send out specific products to users after successful order placement.
