Experience

Software Engineer • Persistent

Jul 2022 - Feb 2023

- Developed the back-end of the Unfold Quotes app using Java and Spring Boot to ensure smooth functionality and optimal performance.
- Implemented innovative features and functionalities in the app, enhancing the user experience and increasing engagement.
- Collaborated with a team of developers to ensure seamless integration of the back-end with the front-end, resulting in a cohesive and user-friendly app.
- Conducted thorough testing and debugging to identify and resolve any issues or bugs, ensuring a high-quality and reliable app for users.

Software Engineer-intern • Persistent Systems

Feb 2022 - Jul 2022

- Utilized Java programming language to create and deploy applications, resulting in enhanced operational efficiency and increased productivity across multiple business processes.
 - Fostered collaboration with cross-functional teams to devise and implement software solutions that seamlessly integrated with existing systems, ensuring smooth workflow and optimal performance.
 - Displayed a proactive approach by actively seeking out opportunities to acquire knowledge and remain updated with the latest advancements in Java development technologies.
-

Education

Bachelor of Engineering - BE • Neil Gogte Institute of Technology

Jun 2018 - May 2022

Computer Science and Engineering - CSE • Grade: 7.35

Projects

Swiggy Clone with Real-Time Data

Jul 2023 - Aug 2023

Developed a Swiggy UI clone using React.js, providing users with a seamless food ordering experience. Integrated real-time data updates for order tracking and restaurant availability, enhancing user engagement and satisfaction.

Skills

Programming Languages - Java, Javascript(Basics)

Web Development - Reactjs, HTML, CSS

Database - MySql, Sql

Version Control - Git, Github

Familiar with Java8 features, SpringBoot
