ACADEMIC PROJECTS:

Project #1

Title : Hostel Management System

Environment : Microsoft Access 2003 , Visual Basic 6.0 .

Description:

Hostel Management System is the system that manages the student data, staff data, students admission. Process and create receipt for the fees paid by the student who stay in the hostel and also help in maintaining visitors messages. All these hostels at present are managed manually by the hostel office. The registration form verification to the different data

processing are done manually.

Project #2

Title : Sports Management System

Environment : Windows 10 and above , PHP , My-SQL , HMTL , CSS.

Description:

The software to be produced on **"Sports Management System (SMS)".**There are 2 users' i.e., the admin and the employee. Admin provides username and password to the employee. He also has the right to add or modify the given username and password of the employee. Using this username and password, an employee can login to the system. The first procedure is the student registration. Here the employee enters all the details of a student including the sport they like to participate. All these information will be stored in the database.
