- Getting Information — Observing, receiving, and otherwise obtaining information from all relevant sources
- Making Decisions and Solving Problems — Analysing information and evaluating results to choose the best solution and solve problems.
- Interpreting the Meaning of Information for Others — Translating or explaining what information means and how it can be used.
- Processing Information — Compiling, coding, categorizing, tabulating, auditing, or verifying information or data.
- Establishing and Maintaining Interpersonal Relationships — Developing constructive and cooperative working relationships with others, and maintaining them over time.
- Organizing, Planning, and Prioritizing Work — Developing specific goals and plans to prioritize, organize, and accomplish your work
- Training and Teaching Others — Identifying the educational needs of others, developing formal educational or training programs or classes, and teaching or instructing others.
- Give Training on - US Healthcare Market Overview Induction, RCM Cycle at Company level to all new joiners.
- Configuration of Measures on RMM server. Basically, depending on the conditions which are procedure and Diagnosis which physicians test we verify whether that particular condition is getting status as per required documents provided by CMS. If the condition is not fulfilling the required criteria need to put data as per requirement and then test or debug it on SQL Server so that it passes for that particular condition. On seeing the status of conditions physicians meet with criteria of performance meet or not meet so that they can get incentives based on the service.
- Working on JIRA and QMS
- Worked on initiatives like Eligible Professional (EP), Eligible Hospitals (EH), Merit-based Incentive Payment System (MIPS), MU2 Usage, Cypress Certification
