WORK EXPERIENCE

Software Engineer
Techmahindra Ltd., Pune

02/2021 - Present   *Pune, Maharashtra, India*

Achievements/Tasks

- I have worked on Prepaid Digital 100% project. This project introduced the ability to Bell Mobility prepaid customers to view their usage such as data, voice, LD, text, etc (web). For Lucky Mobile rate plan change effective date vs future date (next Usage period). That is, change the current effective date from next bill cycle to effective immediately (web & mobile app)!
- I have worked on the Temporary Suspend Restore Self-Serve project. This project is to build new functionality in self-serve to enable Mobility customers to suspend and restore their wireless service for lost/stolen devices without the need of calling into Care!
- I have worked on Multiline Project. This project enhanced eCare flows to handle Multi-Line (ML) Offers with better customer experience and more efficient handling of the ML SOCs. Removed Confirmation Light Box for regular and optional Multi Line SOCs. Displayed ML Offers of Service type (incentiveType=S) in Add-Ons Section ($0) and its expiry date if there is any on the ML Offer!
- Currently I am working on Single Rater project. This project aims to provide a consistent experience to both customers and agents during their unbilled cycle by consolidating the domestic data guiding and rating within a single system (Agile rating and Charging).

EDUCATION

Bachelor Of Engineering
Shri Shivaji Vidya Prasarak Sanstha's Bapusaheb Shivajirao Deore College of Engineering, Dhule
