PROFESSIONAL EXPERIENCE
ASSISTANT VICE PRESIDENT – Delivery Lead & Strategy Manager
Barclays Tech Centre of India | Pune, Maharashtra | Feb 2019-Present

- Risk & Control Lead for Barclays UK managing control program implementation for Regulatory Compliance, Auditory requirements, in collaboration with Chief Controls Office, to manage Operational, Credit, Process and Reputational Risks, using advanced data analytics and BI.
- Oversee **10 portfolios** to direct and analyze data from multiple sources, applications and products, ensuring deadlines are met and effectively govern the execution of **1300+ controls** across the organization, in turn creating strategic solutions to remediate **100+ controls**.
- Contribute to the development of long-term organizational strategy by conducting research and analyses on ESG related initiatives impacting organization's sustainability, with factors relating, but not limited to climate change, resource wastage, community engagement with key focus on ethical practice goals.
- Mentor and guide learning and development of resources and additionally, support the recruitment process in line with organizational strategy. Manage cross-functional teams, review their performance, and manage resources.
  - Partner with stakeholders and provide thought leadership and collaborate with business unit heads across the wider organization on strategy and delivery of projects.

CONSULTANT – Product Lead
Teradata India | Pune, Maharashtra | Oct 2015-Feb 2019
Client – Air Canada, Barclays, SC Johnson

- Work closely with clients as part of a cross-functional team responsible for the delivery of large-scale DWH/BI solutions to support their operational, tactical and strategic reporting as well asother analytical business needs.
- Translate business requirements into detailed system requirements and technical design specifications. Advocated estates of **5+ petabytes** of data to bring down database resource consumption to **0 petabytes** and thereby, bringing down the annual investment of **5-6M$ to 0$**.
- Collaborate with internal teams to participate in the end-to-end delivery lifecycle of such projects from business requirements gathering to solution design, development, testing and roll-out.
- Investigate, model, define and document required business processes, including business process that improve data collection and quality.

ANALYST – Business and Data Analyst
Tata Consultancy Services | Pune, Maharashtra | Sept 2012-Oct 2015
Client - Morgan Stanley

- Work with regulatory team and assist them in the activities across all financial instruments, spanning across all types of accounts, which in turn is consumed by Legal and Compliance team for various Auditory, Risk Management and Management Reporting.
- Refining metrics (KPIs) and standard reports to better serve the needs of executives seeking decision support
- Translate insights and patterns embedded in data assets into language the business can understand.
- Tracking anomalies and outliers within financial and transactional data that might signal fraudulent activity.
