Career Summary

- Having **4+ years** of professional IT experience with **Manual and Automation**, functional testing, **API** testing and **Database** testing

- Having 2 years of experience in **Automation Testing using with Selenium**
- Experience in: Functional Testing, API Testing, Database Testing and Mobile App testing
- An active contribution in the design, review, testing, troubleshooting & debugging of the process, post-implementation, application maintenance and enhancement support to the client for the product / software application
- Improve quality reduce defects by supporting best quality practices and implement effective process improvement methods
- Through understanding of the entire **Software Development Life Cycle**, **Software Testing Life Cycle** and **Bug Life Cycle**
- Hands on Experience in **REST** testing using **POSTMAN** and **SOAP UI** Tools
- Knowledge on HTTP Status codes, HTTP Methods, URI and Headers
- Excellent knowledge in **Agile Methodology**, specific to **Scrum** Framework, JIRA tools
- Understanding of user stories and find the scope of the testing and execute in **JIRA** tools
- Experience on Selenium automation using **Selenium WebDriver** and **JAVA**.
- Implemented Automation Frameworks like **Page Objects framework, and Hybrid framework**, Well versed in using **Locators**.
- Experience in writing **X path** to find **Dynamic elements**
- Design the Test case reports, **Bug reports** and Sprint reports
- Special proficiency in Smoke, Sanity, Functionality, Regression, Web Services, Cookie, System Integration, Comparison, Compatibility, Exploratory**,** Split and Business Acceptance Testing
- Good exposure in Testing **Approach & Methodology** and QA Artifacts
- Hands on experience into Data Driven with **POSTMAN** and **API chaining** concepts from **POSTMAN**
- Expertise into Variables, **Json** explore, environment setup and **Newman** reportsgenerate with Postman
- Good knowledge on Mobile App Testing and verify the compatibility of the applications
- Expertise on verify the application into different browser to perform cross browser testing
- Hands on experience to verify the data from database using SQL
- Have very good knowledge on bug fixing and root cause identification of production issues.
- Good Team player with interpersonal communication skills.

Work Experience

- Working as **Test Engineer** with **Value Labs** (Under pay roll of BLUELINER SOFTWARE SERVICES PRIVATE LIMITED), Hyderabad since Feb-2019 to till date

Academic Profile

Completed B.Tech in Electrical and Electronics Engineering from JNTU Hyderabad.

Technical Skills

Operating Systems	Microsoft Win Operating Systems
Bug Tracking Tools	JIRA and ADO
Languages	XPath, JSON, XML and JSON Path
Web Services Tools	POSTMAN, Fiddler and Rest Client
Database	MS- Sql server and SQL Server
Testing	Manual Testing, Automation testing, Web Services Testing and API Testing
Methodologies	Agile Scrum Frame work and V-Model
Automation Tools	Data Driven testing with POSTMAN, Selenium with Java

Project 2

Project   : The Hartford- AARP Auto Insurance Program
Client   : The Hartford
Role   : Functional Tester
Team Size   : 10
Tools   : REST, API, JSON, POSTMAN, Swagger, Jira and ADO
