## PROJECTS

Project 1- **Flow through Provisioning**

Tools- CSG, ICOMS, Gateway, Provisioning System Gateway, Trading Partner Gateway, Order Capturing Gateway, OMSE

**Project Description:**

This is basically a telecom domain project. FTP project covers the provisioning part and billing part, as per requirement and User stories we need to test the flows though Order Placement tools i.e. ICOMS and CSG. We also validate the orders in below gateways:

1. OCGW: Order Capturing Gateway provides normalization of billing messages.
2. PSGW: Provisioning System Gateway manages provisioning messages between OMSe (+AAD, EPT) and BPS.
3. TPGW: Trading Partner Gateway manages Local Service messages between OMSe and Neustar.

Project 2- **Business Communication Platform**

**Project Description:**

This project offers many features like chat facility, group channels, projects / groups / teams management, task management and reporting, internal feeds posting and sharing, Administrator module contains roles/ tenancy / document / contract management.

Project 3- **Charity-Rewards-Entertainment**

**Project Description:**

This project is a web and mobile application for the charity purpose. With this application, charity can be done for FREE, while having fun and getting rewarded in return. It also has the communication feature.
