Selected for Nafional Means cum Merit Scholarship.

Parficipated in ZEE SA RE GA MA PA 2020

PROFESSIONAL DETAILS

Software Developer - 17 Jun'19 to 31 Jul'19

ASP TECH SOLUTIONS

The Product is a Dynamic Web-based applicafion.where we need to maintain all the data adequately. My role in the HELP THE NEED project is to develop the Back end part using PHP technology. We used the waterfall model to develop this whole applicafion.

Software Developer – 23 Nov'20 – till date
APCFSS – Tadepalli

Working in Janmabhumi project with different universities examinations services using Java technologies.

PROJECTS

Plateform Enabling Analyzed Solufion (PEAS)

Plateform Enabling Analyzed Solufion is a web applicafion that is used to provide a plaVorm for the students to access and download the quesfion papers along with solufions for the exams being conducted in my college. It is also focused on clarifying the doubts of the student. Interacfion between faculty and students can also be done through this source. HTML, CSS, PHP, Bootstrap, Java Script technologies are used.

A-Way Home

A-way home is RGUKT's first comprehensive online food delivery web Applicafion and mobile applicafion brings a whopping 50+ products to over 9k Happy Customers.(www.awayhome.in).HTML, PHP, MySQL, Bootstrap Technologies are used.

Feed the Need

We don't need more volunteers' and we don't need to reach each person for asking for help. Here we simply provide our site address to the people throw adverfisements, palm let, etc, If anyone willing to donate they simply enter into our site and donate there. And it's available all over the world. HTML, CSS, PHP, Bootstrap, Java Script technologies are used.

Image Steganography

This project intends to give an overview of image steganography and its uses and hiding files (text files, audio files etc.) by using LSB (least significant bit) and
AES (Advanced encrypfion standard) algorithms

where AES used for password protecfing system so that if anyone can find the stego (covered) image they will not read the message because data sfill in the form of encrypt and LSB is used for hiding the data. This project is used to improve the compression rafioof the image to the text.

PERSONALITY TRAITS

- Crifical Thinking
- Decision Making
- Problem Solving
- Team Management
- Analyfical Skills
