WORK EXPERIENCE

Certified Software Engineer professional with a total of 10 months of work experience.
Experienced in working for Service based company.
Have worked on BA Project.

Located in: Bengaluru, India

1.Accenture, Bangalore —*Application Development Associate*

November 2019 – September 2020, 10 months

Worked as Business analyst in service team which oversees the functional requirement and maintain project update in order to develop required application.

- Gained knowledge on BA process, insurance.
- Basic knowledge on STEP tool and CL portal working.
- Understanding on how to write BRD.
- Helped teammates with documentation reviews.
- Gained knowledge on Personal Insurance.
- During training was responsible for reviewing peer codes and solution as scrum master.

2.Cranes Varsity, Bangalore — *Intern*

January 2019, 1 month

Worked on one product based project using microcontroller.

- Project involved developing a prototype for alcohol detection using LPC 2148 microcontroller to detect whether a driver is driving a vehicle under the influence of alcohol in order to prevent road accidents.
- The alcohol detector was used to sense alcohol consumption of the driver and send message to the precariously stored number using a GSM model
- Buzzer was used to alert the driver not to drive if alcohol consumption was above frequency that was mentioned in code.
- Testing phase was done utmost care and accuracy.
