Summary

I am an experienced UI developer with training primarily in React JS and Web technologies. Other skills include Python development, database management and problem solving.

Very keen to explore new technologies and domains, I encompass good interpersonal skills and english proficiency.

Experience

UI Developer
Persistent Systems
Jan 2023 - Aug 2023 (8 months)
Attaining training for skill exposure and enhancement as required pre-onboarding.

Team Manager
PESMCOE ACM Student Chapter
Mar 2023 - Mar 2023 (1 month)
Organized the INVICTA '23 held on 20th and 21st March 2023 event under the ACM Student Chapter of PES Modern College of Engineering.

Main feature of this event was that it was planned and executed under the span of 20 days, which included management of technical and non-technical events.

Other tasks included social media promotions, contacting sponsors and handling documentation of the whole event. I would like to mention about my assistance in the backend development of the technical events under INVICTA.

Web Developer
Climate Collective Pune
Dec 2021 - Feb 2022 (3 months)
This internship focused on making a low-carbon website and associated development using energy-efficient resources.
Education

Progressive Education Society's Modern College of Engineering
Bachelor's degree, Computer Science
2019 - 2023

Licenses & Certifications

Server-side Development with NodeJS, Express and MongoDB - Coursera
