PROFESSIONAL SUMMARY:

Experience of **7+ years** in technology startups and enterprises. I have been a part of many high-velocity teams in which I have built robust end-user products end-to-end across stacks (mobile, web, backend). I am a polyglot developer with a special interest in **Golang, Java /JavaScript, Angular**, and concurrent programming. I have good knowledge of failsafe microservices architecture. I enjoy working on designing, implementing, and scaling large distributed platforms.

EDUCATION:

B.Tech | Acharya Institute of Technology, Bangalore/ 2015

WORK EXPERIENCE:

➔ **MSH Talent Solutions**

Full Stack Developer | June 2018 - Present

- **Tech Stack:** Golang, GraphQl, Java, Angular, Grpc, Mongodb, AWS, Kafka, GCP, Microservices, Rest Api
- Worked in an extremely fast-paced development environment delivering key business features.
- Worked on key features of our product Aeon hire It is an Applicant tracking system.
- Designed and implemented queries and mutation for business requirements with microservice architecture and used grpc for inter service communication.
- Used CI/CD, git, Jenkins, Docker for deployment.
- We provider AI based Job description generator. I have worked on Open AI.
- I have 3 years of hands-on experience working with Apache Kafka, including setting up, configuring, and managing Kafka clusters, designing robust data pipelines, and implementing real-time streaming solutions.
- Redis and Asynq for asynchronous tasks.
- Consul as service discovery.
- Improved performance of a few APIs by implementing cache and refactoring our code with the help of distributed tracing and logs.
- I have developed a product called Aeon. I worked as full stack developer.
- In Aeon we are building applicant tracking system (ATS), customer relationship management (CRM) and operations software for staffing industry.

- MSH Aeon Application Suite is the next generation talent solutions product suite which are built using disruptive technologies. Aeon is a culmination of MSH Talent Solution Experience on the industry and the product is intended to fulfil the void in the world of talent solutions.
- All employees of our current organization are using this product. It can be accessed through below links
  - https://www.mshaeon.com – Aeon Product Suite
  - https://jobs.mshaeon.com – Job portal where we publish our jobs
  - https://aeonhxm.com/ - Aeon hire Marketing Site
  - https://hire.aeonhxm.com/ - Aeon hire Ats (Applicant Tracking System)

➔ **Infosys Limited**

Full Stack Developer | November 2015 - June 2018

- **Tech Stack:** Java, Spring boot, Angular, Restful web services, Bootstrap, MySQL, AWS
- I worked for a project named Agent Portal. Agent Portal deals serves as a platform for insurance agents which has all details of his commissions, regulatory compliance and lot more.
- This product uses Angular2 as front end and spring at the backend using restful as a communication medium between the two cross platforms. Here I worked as a full stack developer
- I developed rest apis for angular frontend as used them on frontend with HTML and css.
- Used java as backend language
- MySql and Oracle were the databases used.
