CAREER OBJECTIVE

Detail-oriented Software Manual Test Engineer with almost 4 years of experience seeking a role to utilize my proven expertise in quality assurance. Committed to ensuring software reliability and functionality, I aim to contribute to a dynamic team's success by executing comprehensive testing strategies, documenting defects, and collaborating effectively. Eager to expand my knowledge and contribute to the development of high-quality software products in a challenging and growth-oriented environment.

SUMMARY

- Having overall 4 Years of experience as Manual Test Engineer, discussion with Business Analyst, preparing and reviewing Test Cases, coordinate with Software Developers and follow up for Release.
- Engage with managers and Business Analysts to understand the requirements of process, products, services, and software to improve efficiencies and add values.
- Creating test cases, understanding the BRD, interaction with developers and testing the software in every possible scenario.
- Experience in Functional Testing, Regression Testing, Sanity Testing and User Acceptance Testing (UAT).
- Identifying and prioritizing technical and functional requirements. Involved in requirement gathering, change request, product improvement and enhancement.
- Good reporting skills, email communications & follow- up skills for closing pending activities & defects.
- Well exposed to Software Development Lifecycle Methodology (SDLC).
- Experience in providing support for ongoing projects and handling new requirements for an existing project.

Technical Skills:
.
- Tools: SQL, Postman, JIRA
- Methodology: SCRUM, Agile Project Management.
- API Testing
- Microsoft Word, MS - Excel, PowerPoint
- Learning Python for Automation Testing.
