Project Title: "Performance Analysis of LPC and MFCC Features in Kannada Isolated Word Recognition"

Description: The main aim of this project is to identify the spoken words and convert them into readable text. In this project we used two feature extraction methods i.e, Mel frequency cepstral coefficients (MFCC) and linear predictive coding (LPC) with Artificial neural network (ANN) as classifier using MATLAB. It is observed that Kannada vowel recognition using MFCC in combination with ANN results highest recognition accuracy and LPC is least recognition accuracy.
