EXPERIENCE

DataFacade - Remote
2023 - Current
Senior Frontend Developer

- Engaged in innovative product design, spearheaded ideation, conducted market research, and provided visionary leadership to the front-end team.
- Led and mentored a team of 4 developers, driving sprint planning, enforcing robust code reviews, conducting tech sessions, bugathons, and inspiring milestone achievements.
- Optimized LCP by 65% and Speed Index by 40% by using Google Lighthouse for better performance of the data application across all devices.
- Achieved 30% faster feature development and a significant decrease in downtime and a 70% decrease in production bugs by automating testing (Cypress & manual units) through Node. js, Cypress suite, processing JSON input for comprehensive product testing.

Tripadvisor - Remote
2022 - 2023
Senior Software Engineer - Frontend

- Led global frontend migration for Vacation Rental and flight segment with 5 developers, fostering cross-team synergy.
- Successfully migrated core pages to a new platform, resulting in increased revenue of approximately $1.5 million.
- Developed, tested, and deployed 10+ features like VR List, Property Cards, Search filters, Photo Gallery, smart pickers, and review sections using React, Typescript, and GraphQL
- Implemented advanced ReactJS patterns, virtualization, and better localizations by creating a custom hook along with the platform library.
- Focused on improving the performance of pages and reducing the speed of Index through optimized component rerenders and SEO-friendly practices using SSR.

Loginext - Mumbai
2020 - 2022
Software Engineer - Frontend

- Core Team member in migrating the entire front end from Angular to React with a team of 3.
- Developed a component wrapper for major features in the product, including Custom Templates, Dynamic Listviews with Maps, Advanced Filter Search, Advanced Configurations Pages, and Client Onboarding Flows.
- Set up and developed a frontend library using React.js, Typescript, Redux, HOC patterns, context APIs, render Components, and moment.js for handling time zones across the app.
- Leveraged React-leaflet for handling map markers and interactions, React-Portals for Toast messages, and global models.
- Utilized Styled-Components and ContextAPIs extensively for global themes across the web page.
- Implemented test cases using Jest and Enzyme before publishing the libraries on npm.
- Rewarded Employee of the Month in Q3 2020 and got elevated to Senior Software Engineer in 2021, leading a 10-member team, mentoring and helping them achieve their professional goals.
- Conducted technical sessions for learning and knowledge sharing among fellow developers.

Unifynd - Mumbai
2019 - 2020
Full stack Developer

- Experience building APIs in Node.js, Express.js, knex.js, and PostgreSQL.
- Worked with Vue.js, Vuex, React, Redux, GraphQL, and Nuxt.js for SSR,
- Identified ways to improve design and development, focusing on creating a quicker web experience by reducing the TTI by 50%
- Participated in design reviews and provided input to design recommendations.

Pipa Bella - Mumbai
2017 - 2019
Front end Developer

- Revamped the entire e-commerce website from Magento 1 to Magento 2.
- Developed clean interactive components and functionalities using jQuery, Vue.js with Magento framework, HTML5, and PHP.
- Built various UI interactive games including canvas.js, GSAP, and three.js.
