PROJECT DETAIL

Project # : **KSNDMC.ORG:** December 2022 to Till date This Project is Based on TRG and TWS.

Project # : **Touchless door bell:** January 2017 to May 2017, The visitor comes to the house, first he/she searches for the doorbell. If the house owner is using the automatic doorbell system with the object detection, then the visitor need not search for the switch of the door bell. Automatically, the sensor will sense the object or the person, hence, the sound will produce at the door.

Project # : **DBMS: Online Task Management:** August 2017 to December 2017, It's designed from a user point of view. The project provides platforms for admin to update day to day update tasks and provides information about user tasks.
Programming Background : HTML, PHP.

Project # : **3D House:** January 2018 May 2018 In the project you will see a house with everything inside. But the amazing part of it is that everything is done by code.
Programming Background: Opengl,C++.

Project # : **Live video feed based face recognition:** August 2018 to May 2019 The ability to automatically recognize human faces based on dynamic facial images is important in security, surveillance and the health/independent living domains.
Programming   Background:
Python. Front end Design:
HTML, CSS.

STRENGTHS

Dedication, Self Confidence,
Learning Attitude has the ability to adjust easily to the situation.

EXTRA CURRICULAR
