❖ Neutrino's(Angular & NodeJs) Trainings

Project #1

Project Name: Customer Experience Survey Portal
Role: Software Developer
Technology: OutSystems 11
Duration: Aug 2022

Project Overview:
The customer experience survey portal is for capturing feedback from the users on their experience with customer care services. Based on user feedback a visualization of the user's experience is presented in representational formats like charts and other visual diagrams.

Responsibilities:
- Responsible for creation and maintenance of the UI.
- Creation and mapping of multiple entities to their screens
- Maintaining efficient usage of data and documentation of the same
- Checking overall functionality of the application

Project #2

Project name: Pradhan Mantri Suraksha Bima Yojana

Language of implementation: Outsystems (Version 11)

Description: PMSBY is a one-year accidental insurance scheme renewable from year to year offering coverage

For death or disability due to accident.

Project #3

Project name: Secure Data in The Clouds

Language of implementation: Java, HTML, JavaScript

Database: MY SQL

Description: A data-centric access control solution with enriched role-based expressiveness in which security is focused on protecting user data regardless of the Cloud service provider that holds it. Novel identity-based and proxy re-encryption techniques are used to protect the authorization model. Data is encrypted and authorization rules are cryptographically protected to preserve user data against the service provider access or misbehavior. The authorization model provides high expressiveness with role hierarchy and resource hierarchy support.
