Work Experience:

1. Project	Optin

Description: Worked on Flutter app for a US client for 2+ years as a part of a flutter team of 5. The app is easy-to-use interface for part-time retail workers to view their agenda for the week, drop/pick-up shifts, ask for time-off, respond to surveys etc. as well as for managers to create/assign shifts, manage workers' time-off, view a weekly schedule, create surveys and much more.

Responsibilities:
- E-commerce and a big application
- Building the application in Flutter
- Used BLoC and Cubit architecture pattern
- Firebase integration - crashlytics, analytics
- Developed responsive and visually appealing layout for different screen sizes of android, ios and web

Play Store Link: https://play.google.com/store/apps/details?id=com.optininc

2. Project	Taccto App (by Protools)

Description: The purpose of this app is to increase outreach to customers and make viewing and ordering of products an easy process.

Responsibilities:
- Developed whole app's frontend: E-commerce
- Building the application in Flutter
- Used BLoC architecture pattern

Play Store Link: https://play.google.com/store/apps/details?id=com.protoolsme.taccto
APP Store Link: https://apps.apple.com/us/app/taccto/id1558054335

3. Project	Mango App

Description: The aim of this mobile application is to provide an online platform for merchants and customers of vegetables, fruits, glossary products etc.

Responsibilities:
- developed app in flutter: E-Commerce app
- mainly two parts of an App – Merchant and Customer
- similar like flipcart, amazon apps, but for local region
- Provider architecture pattern

Play Store Link: https://play.google.com/store/apps/details?id=com.ogd.mangoapp
