Description:

The National Account Service Company (NASCO) is a company that provides single-system access to a network of BCBS Plans for processing health care transactions for both single-state and multi-state employers. In other words, NASCO helps BCBS Plans manage health care benefits for their customers through one shared

system to which the Plans are linked. This project deals with application of Internal and External Benefits that are applicable for further Claim Processing like Adjudication.

NASCO was first originated from GM Michigan and the system was modified into a single claim processing system. The founding members of NASCO are Blue Shield of California, Empire of Blue Cross Blue Shield (BCBS), Anthem BCBS of Connecticut, Horizon BCBS of New Jersey and BCBS of Michigan. NASCO is considered as Covered Entity, Clearing House and Business Associate.

RESPONSIBILITIES:

- ➢ Involved in gathering the requirements from the Onsite lead and Client manager.
- ➢ Analysis, Time-Estimation, Coding, Testing, Implementation of the Customer supplied requirement.
- ➢ Impact Analysis of existing elements.
- ➢ Analysis of Requirements.
- ➢ Coding JCL's, copybooks and programs as per technical specification.
- ➢ Involved in Preparing Unit Test plans and Integration Test plans.
- ➢ Knowledge Sharing.
