GOMATHI.M

web-Developer
gomathimohan1997@gmail.com
(+91) 6383207865

Summary

- Over 3.4 years of experience in web development.
- Good experience with HTML5 standard markup language for creating web pages.
- Strong knowledge and practise in angular5.
- Technical expertise in Java, JavaScript, ES6, Angular, MySQL , HTML5/CSS.
- Good Knowledge in Angular Bootstrap Framework.

Skills Summary

Programming Languages/ Scripting Languages	:	JavaScript, ES6,C++,Java
Operating System	:	Windows
Web Services	:	JSON
Familiar In	:	Git,BitBucket,JIRA,VS Code

Project Details

DNSPRISM   (Meyaa Technologies)

Team Size	:	4
Platform Used	:	Angular,JavaScript,HTML5,CSS,Bootstrap,MYSQL

Description

• Full working dashboard, pie chart, primeng table on clicking of
points we need to have a sliding popup with some information.

• single-page-application are web apps that load a single html page
and dynamically update that page as the user interacts
 with the page. which contains the various kinds of steps.

• Designs - (Funcions, Services, Components, Modules....etc).

Roles & Responsibilities

Worked as Developer with below responsibilities

- Project environment setup
- Requirements gathering
- Develop new components, serevices, modules and routes

● Develop to use resuable pie chart and primeng tables.

Modules Involved

● Modules configure the injector and the compiler and help
organize related things together

● Supports static, parameterized, redirect, and wildcard routes, as
well as custom route data and resolve methods.

 ● Components are the most basic UI building block of an Angular app.
An Angular app contains a tree of Angular components.

 ●Dashboard to display the Live tracking the buses over the routes.

GISMO-V2

Team Size   :   4
Platform Used   :   HTML5,JavaScript,CSS
Database   :   Quiteun2_gismo_release

Description
- Gismo application is used to car service factor to note all details from customer vehicle and create invoice details to show using a gismo application.
- In this application we are using a language from angular. Vehicle reference number should display clearly along with download button with neat display. Similar to that now.
- we have vehicle details API – so no more scrapping in gismo – site

Roles & Responsibilities
Worked as Developer with below responsibilities
- Project environment setup
- Requirements gathering
- Develop new components, services, modules and routes.

Modules Involved
- Route Module to create, edit and delete the routes and assign the routes for the vehicles.

- All Angular Version 1.x projects will use this as the base framework code.

- Cookies are small encrypted text files that are stored on your computer or other device by this Website.

- Garage Invoicing and Simple Management.

LOAN TOOL PROGRAM

```
Team Size              :      4
Platform Used          :      Angular,TypeScript,CSS,Bootstrap
```

Description
- We have got LTP3 – Loan tool programme application mockup finally ready by designer.
- The application designed and developed using following technologies HTML, CSS(Bootstramp), angular and MySql.
- The application is designed for each layout desktop, tablet, small devices, mobile.

Roles & Responsibilities
Worked as Developer with below responsibilities
- Project environment setup
- Develop new components, services, modules and routes.

Modules Involved
- Lazy loading helps keep initial bundle sizes smaller, which in turn helps decrease load times.

- An Angular application needs at least one module that serves as the root module.

- A provider is an instruction to the Dependency Injection system on how to obtain a value for a dependency. Most of the time, these dependencies are services that you create and provide.

- Components shouldn't fetch or save data directly and they certainly shouldn't knowingly present fake data. They should focus on presenting data and delegate data access to a service.
