TECHNICAL & BUSINESS PROFICIENCIES

Technical: Directory Service, Lightweight Directory Access Protocol (LDAP), Backup, Cybersecurity, Wireless Security, Cryptography, Network Security, PowerShell, Linux File Systems, Linux Command-Line Interface

Business: customer support, project management, process improvement

PROJECTS

Credit Card Fraud Detection using AI Models

Platform: Google Colab Notebook

Programming Language: Python (Jupyter Notebook)

Dataset: European Credit Card Transactions Dataset (Kaggle)

Description: Developed a machine learning model to predict fraudulent transactions. The model was trained and tested using a dataset of European credit card transactions available on Kaggle. Various AI models were evaluated for their effectiveness in detecting fraudulent transactions.

Key Achievements:

- Successfully implemented multiple AI models for comparative analysis.
- Achieved significant accuracy in predicting fraudulent transactions, enhancing the security measures for credit card usage.

ADDITIONAL SKILLS

- **Technical Proficiency** in various operating systems, software applications, and hardware.
- **Problem-Solving Skills** to diagnose and troubleshoot technical issues.
- **Project Management** skills for planning and organizing IT projects.
- **Communication Skills** to explain complex IT concepts in simple terms.
