Computer in pharmacy is used for the information of drug data, record and files, drug management (Creating, modifying, adding and deleting data in patients files to generate reports), business details. Computers are almost related to every corner of pharmacy field. These are utilized in the drug design techniques, retail pharmacy shop, clinical research centers, crude drug identification, drug storage and business management, hospital and clinical pharmacy, in pharmacy college for computer assisted learning.

Nov 2021 - Jul 2022

Major Project
Attendance System Using Face Recognition

It is Straightforward to identify to any person from different facial image. The face recognition system is high-speed and reliable technology. This biometric is very safe because it can identify people without any mistake. Face recognition is considered the first step toward building biometric access control-based application scenarios, where biometric features are extracted from the individuals. This system is used in many government offices, firms, bank, and other place. (Using Python and PyCharm.
